

Please do not change any abilities of satellite radio. I pay a premium so I don't have to listen to useless commercials. I pay a premium to get the traffic, weather and news immediately, not after I finish listening to numerous commercials or other mindless information that doesn't interest me. Again, I pay a premium out of my own money to have this privilege. No government actions should take this away from me. The USA is a free country and big money should not take the above ability away from me.
